

## Care and Maintenance

Congratulations on your purchase of a Sonobath vessel sink. With minimal proper care and maintenance, it can be enjoyed for many years to come.

### **Cleaning:**

Sonobath vessel sinks are made from CaesarStone™, which is a hard, nonporous surface that is simple to clean. For daily cleaning, soap and water or a mild detergent is all that is required to maintain its luster. If necessary, a **non-abrasive** cleanser such as Soft Scrub Liquid Gel with Bleach or Comet Soft Cleanser Cream With Bleach can be used. Adhered materials like food, gum or nail polish can be scraped away with a plastic putty knife; any marks left by the blade can be removed with Soft Scrub Liquid Gel. Thoroughly rinse the surface with clean water to remove residue

### **Maintenance:**

While CaesarStone™ does not require sealants or waxes to maintain its luster, occasional polishing with Soft Scrub Bleach Gel or Comet Gel will keep the quartz surfacing looking its best.

### **A Note On Honed Material:**

Please understand that HONED, TEXTURED and MOTIVO finishes will require more daily maintenance than our polished finishes and metal marks, finger prints and other signs of daily living will show on honed material. Most of these marks can be easily removed with little effort and non-abrasive cleaning products such as Soft Scrub Liquid Gel.

### **A Note On Pebbles:**

Pebbles should be removed and cleaned with mild soap regularly and resealed annually.
